BEExhibition – a „BUZZING“ Summary of their work

Summsummsumm...

Bees are important insects in our ecosystem. When we speak of a bee, we mean the honeybee. Bees live together in a colony that can contain up to 60,000 bees. The colony consists of a queen bee, thousands of workers and a few hundred males, the drones.

Exciting, isn't it?

Even more exciting is that all these facts are presented in an easy-to-understand way with the help of an oversized bee maze and provide a lot of fun for young and old!
